Here is the font's normal 0 (which is reverse sense)
But it is fixed (un-reversed) in lstlisting:

```
' 0000 having 1=1--
' or 1 in (select @@version)--
' union all select @@version 0.0--
' OR 'unusual' = 'unusual'
```

as well as in verb: `declare @s0 varchar(8000)`

---

texttt: `foo0bar`
or back to 0
ttfamily: `foo0bar`
or back to 0 again

I didn't break verb, did I? `declare @s0 varchar(8000)`
